## NURSERY CO.

Dear Friends,

2012 has already been a year of numerous positive changes at the Kankakee Nursery.

In early July we launched our new website which we are very proud of and excited about sharing with you. We feel that it is very customer friendly and offers many improvements from the previous site. First, information relating to plant characteristics is much more abundant. Photo availability has greatly increased, with new ones being added daily. Search ability is also much improved. It is now much easier to find the specific item you are looking for due to an enhanced ability to search by distinct traits of the plant you are interested in. Finally, online plant availability is updated constantly to ensure better accuracy, and the on-line ordering process has been streamlined.

A record 43 new plant varieties have been added to production this year, with additional varieties being evaluated on an ongoing basis. We look at new plants from multiple entities. Our experienced team selects only those plants that prove to be either superior to an existing variety or those that offer our customer desirable traits while still meeting our strict criteria in terms of hardiness, disease resistance, etc. You can view these new varieties on pages 8 & 9 of this catalog.

Production of our new line of container grown native trees is also now in full swing. By growing these trees in a #10-gallon container, we feel that we can offer a line of substantial trees with a high quality root system for improved survivability. Most of these trees will be available in the summer of 2013. A list of new container tree varieties in production can be found on pages 8 of this catalog.

Despite the pressures of a weak economy, we have once again expanded our B&B tree production this past spring, with plans to do so again in the spring of 2013 and beyond. By doing so, we feel we are positioning ourselves well for future demand. Our field staff has been doing an excellent job of maintaining our fields and the quality of our stock. Those customers who have visited the nursery this year invariably remark as to how well the nursery looks. We hope that you will find the opportunity to come to the nursery and see for yourself. You are welcome to tour our facilities at any time. We would be delighted to show you around!

Steve Worth  
Sales Manager

## TERMS AND CONDITIONS OF SALE

All prices in this catalog are quoted FOB Aroma Park, Illinois.

- Usual trade terms to customers with established credit
- All others: 25% cash with order, balance COD
- Visa, MasterCard, and Discover accepted on pick-up orders 
- 2% discount if paid on or before 10 days, net due thereafter. Discount does not apply to credit card or debit card purchases.
- Interest is charged on past-due accounts. A finance charge of 1.5% per month (annual interest rate 18%) is applied to invoices unpaid at the end of the month following the month in which the invoice is due.

### TAGGING

Tagging stock in the field is subject to the approval of management. A charge of 10% will be added to the cost of items tagged for spring digging.

### HOLDING CHARGES

Please pick up plant material when ready. A holding charge to be determined by Kankakee Nursery Co. may be assessed to orders not picked up promptly. Additionally, orders not picked up in a timely fashion may be placed back in inventory and sold.

### SHIPPING

Please give shipping instructions and route. If no instructions are given, we will forward to the best of our judgment without assuming responsibility. All goods travel at the purchaser's risk and expense.

### TRUCK DELIVERY

We offer truck service to any part of the United States or Canada. A minimum order of \$1,000 is necessary for this service. See chart on page 5 for shipping rates.

### CLAIMS

We shall not entertain claims for any cause after goods have been accepted or when a report is not made in writing within 10 days after arrival of stock.

### SUMMER DIGGING

A 15% charge will be added to the price of all summer-dug trees. We assume no responsibility for plants purchased for out-of-season digging.

### GUARANTEE

If any nursery stock proves untrue to the description or variety name under which it is sold, Kankakee Nursery will, with proper proof, replace such nursery stock or refund the original amount paid. We shall in no case be liable for any sum greater than the amount originally paid for said nursery stock.

## CONTAINER SIZING

In response to the new container sizing regulations for industry retailers, we have provided a chart of the containers we use in our production operation. The information listed below will help with your compliance to the Uniform Weights and Measures Law and the Uniform Packaging and Labeling Regulations. If you would like us to place compliance tags on your plant material, please specify when placing an order. Please note we will continue to tag our plant material with the plant name; however, the compliance tag is a separate tag for compliance regulations.

## HYDRANGEA

*Hydrangea arborescens* 'Abetwo'  

### INCREDIBALL® HYDRANGEA

H 4'-5', S 5'-6', ZONES 3-9

A reliable and beautiful cultivar of the native smooth hydrangea. Flowers are huge, up to 12" across, with sturdy stems making it resistant to flopping. Flowers open green, and then mature to white. Adds drama and height to any landscape.

*Hydrangea paniculata* 'Jane'  

### LITTLE LIME™ HYDRANGEA

H 3'-5', S 4'-6', ZONES 3-9

A new dwarf form of the popular 'Limelight' Hydrangea. Has the same great features of Limelight, but in a smaller package. Excellent for foundation plantings or a mixed border and an excellent choice for smaller yards.

*Hydrangea quercifolia 'Alice'*  

**ALICE OAKLEAF HYDRANGEA**

H 5'-8', S 5'-8', ZONES 5-9

This upright, deciduous shrub is noted for its large, arching flower panicles featuring white flowers in June that bloom for 6 to 8 weeks and gradually fade to pink. Distinctive, coarse, deep green leaves turn handsome shades of bronze, maroon and purple in autumn. In winter, mature stems exfoliate and reveal rich brown inner bark.

*Hydrangea quercifolia 'Pee Wee'*  

**PEE WEE OAKLEAF HYDRANGEA**

H 3'-4', S 2'-3', ZONES 5-9

Upright, deciduous oakleaf cultivar notable for its compact size and more restrained habit. Less frequent suckering than the species or other cultivars. An excellent specimen plant for foundations or near patios. Also good for groupings in shrub borders or near woodland areas. Flowers emerge white and eventually turn to pink in mid-summer. Exfoliating bark creates year-round interest.
